

Ratoath Community College

Ratoath Community College, Ratoath, Co. Meath

What We Did

Instaspace was successful in winning the tender to manufacture and install a 388m², single storey, modular, pre-fab, building to create additional teaching space for Ratoath Community College.

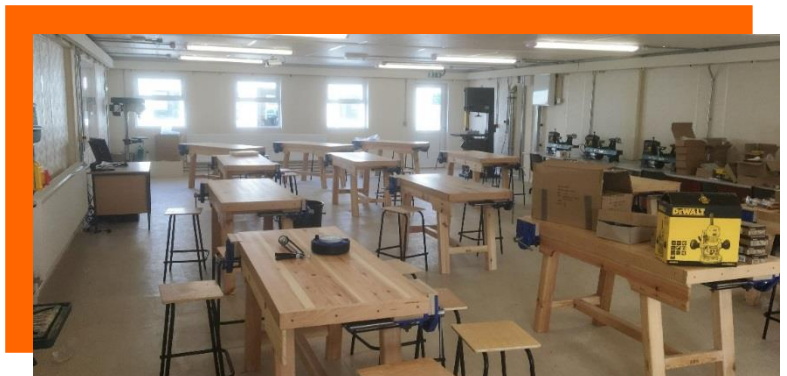

Our work included all aspects of the build, from site preparation to off-site manufacture of modular units, transportation and site installation, through to internal and externally finished works.

We completed a total fit-out of units, including full mechanical and electrical installations, together with complete internal decoration and laying of floor covering, according to client specification.

Key Points

- All work was completed to the highest standards, in order to meet client expectations and in line with current building regulations.
- The total turnkey project was carried out within a busy, active school environment, in the agreed 6 weeks, time frame.
- The finished and fitted-out, prefabricated building provided four mainstream classrooms, communications' room, home economics' room, woodwork room, stores and administration offices.
- Instaspace delivered access ramps and handrails, in addition to making good any disturbed ground.
- We commissioned, tested and certified the fully operational, pre-fab building.
