

## St. Joseph's Secondary School

St Joseph's Secondary School, Co. Dublin

### What We Did

Instaspace was awarded the contract to manufacture and install a fully functional two-storey, prefabricated, modular building, 648m<sup>2</sup> in size, to create much needed additional teaching areas, for St. Joseph's Secondary School.

We completed all aspects of the build from site preparation and off-site pre-fab construction to transportation for on-site crane installation, through to fit-out of internal areas and external finishes.

The project brief included the provision of a building that would incorporate space for a home economics room, science room, art room, mainstream classrooms and administration offices.

### Key Points

- The finished building was a total turn-key package of the highest

standard, delivered within an agreed time frame of 7.5 weeks.

- This project was completed within an active school environment, with all works carried out according to current building regulations.

- As this was a two-storey building, a passenger lift was installed, to allow for flow of traffic between floors.
- Instaspace delivered total mechanical and electrical installation and fit-out, commissioning, testing and certification.
  - We provided interior decoration and floor covering, in accordance with client specification.
