

Claregalway ETNS

Claregalway Educate Together National School Co. Galway

What We Did

Instaspace was successful in winning the tender to manufacture and install a two storey, fully functional, standalone, modular, prefabricated building, within existing school grounds.

The bespoke build consisted of two number classrooms with toilets and a store.

The project brief included all works, from site preparation, through to internal finish.

Key Points

- The pre-fab units were manufactured off-site, then transported and craned into position on-site.
- The building was completed and ready for hand-over, within an 'active' school environment, in 5 weeks.
- The entire turn-key package was completed to the highest standard, with all works carried out in accordance with current building regulations.
- Instaspace secured the area of works, rendered the site ready for the new build and ensured the provision of adequate drainage.
