

Coolmine Depot

Coolmine Depot Staff Canteen for Fingal County Council

What We Did

Instaspace was contracted to build a single storey, fully functional kitchen and canteen area to accommodate sixty people, at Coolmine Depot. The 144m² galvanised steel, modular, pre-fab, unit with adjacent 36m² external covered veranda was commissioned by Fingal County Council.

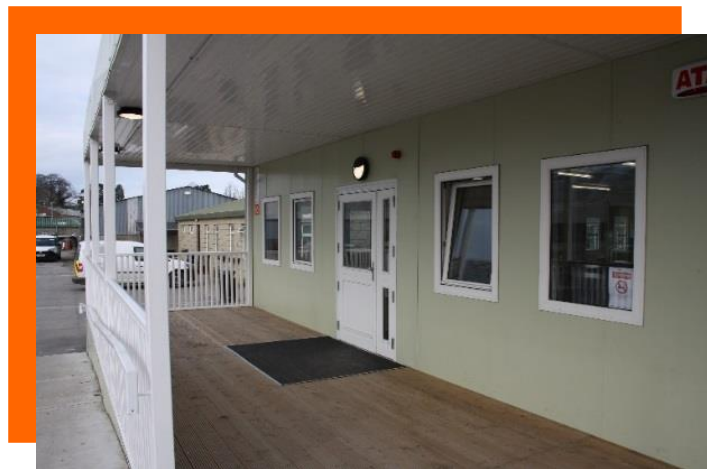

To complete the project, Instaspace carried out all specified works, from site preparation to interior and exterior finish, in compliance with current building regulations.

We prepared and drained the site. The prefabricated units were manufactured off-site, transported, craned-in and installed on site.

Key Points

- Instaspace finished and handed over the total turn-key package within a 3.5 week time frame.
- We provided floor covering and interior finish to suit Coolmine Depot's specific needs.

- The total mechanical and electrical fit-out was carried out in accordance with client specification.
- Instaspace also delivered on commissioning, testing and certification.
- External work was completed by installing access ramps and making good any disturbed ground.
