

Little Angels Special School

Little Angels Special School Co Donegal

What We Did

Little Angels Special School commissioned Instaspace to deliver a multi-phase education campus.

The project included on-site installation of 610m² modular prefabricated building, over 4 phases and completion of all associated site works.

Instaspace manufactured, transported and installed in total five single Classrooms, one double classroom, one gym, two padded rooms, two soft rooms, one Sound proof room, one to one room, shower rooms, toilets, stores and lobby areas.

Key Points

- Health and safety considerations were paramount in achieving full delivery of this project within an active special school environment.
- The building's interior was decorated according to our client's specification which included specialist hoist equipment, specialist internal finishes and floor coverings.

- A total mechanical and electrical fit-out, plus commissioning, testing and certification was also undertaken.
- The exterior works included access ramps landings and railings to comply with Part M of the current building regulations.
